Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 63 and 64 (both in part), 65, 70-76 (all in part), drawn to a method for identifying a modulator of binding between a DmGPCR and an allostatin of SEQ ID NO: 34, classified in class 435, subclass 7.1.
- II. Claims 63 and 64 (both in part), 66, 70-76 (all in part), drawn to a method for identifying a modulator of binding between a DmGPCR and an allostatin of SEQ ID NO: 35, classified in class 435, subclass 7.1.
- III. Claims 63 and 64 (both in part), 67, 70-76 (all in part), drawn to a method for identifying a modulator of binding between a DmGPCR and an allostatin of SEQID NO: 36, classified in class 435, subclass 7.1.
- IV. Claims 63 and 64 (both in part), 68, 70-76 (all in part), drawn to a method for identifying a modulator of binding between a DmGPCR and an allostatin of SEQID NO: 37, classified in class 435, subclass 7.1.
- V. Claims 63 and 64 (both in part), 69, 70-76 (all in part), drawn to a method for identifying a modulator of binding between a DmGPCR and an allostatin of SEQ
 ID NO: 165, classified in class 435, subclass 7.1.
- 2. The inventions are distinct, each from the other for the following reasons. Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP §806.04, MPEP §808.01). In the instance case, the different inventions are drawn to completely different methods,

each identifying a modulator of binding between a different allostatin and a DmGPCR. Thus, the methods are exclusive and require non-cohesive searches and considerations.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for a single group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (I).

Advisory Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruixiang Li whose telephone number is (571) 272-0875. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Brenda Brumback, can be reached on (571) 272-0961. The fax number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, please contact the Electronic Business Center (EBC) at the toll-free phone number 866-217-9197.
